## AVALON PRECISION METALSMITHS NOW REGISTERED AS CONFORMING TO AS9100 QUALITY MANAGEMENT STANDARD.

*Cleveland, OH (USA) April 1<sup>st</sup>, 2015:* Avalon Precision Metalsmiths, a leading manufacturer of investment castings, announces that they are now registered as conforming to AS9100 quality management standard. The certification was granted after extensive quality management system audits by TUV Rheinland of North America, Inc., a premier management systems registrar.

Going above and beyond the traditional ISO requirements, AS9100 certification addresses additional criteria relating to lot control, traceability, quality, safety and reliability, specifically addressing the high level of quality and standards necessary for the aerospace industry. As a globally recognized standard, the AS9100 has become essential for doing business within the aerospace and aviation markets.

Avalon Precision Metalsmiths continues to maintain high standards for all of our finished parts. The recent AS9100 certification formalizes and validates our existing processes, allowing us to continue providing near-net metal parts with unparalleled finish, and exceed our aerospace customer expectations while strengthening our competitive advantage.

### **About Avalon Precision Metalsmiths**

We are a full-service, turnkey investment casting company. With four fully-equipped facilities, we have redundant manufacturing capabilities that enable us to produce top quality products for our customers in industry-leading turnaround times. Unlike many of our competitors, we have off-shore casting capabilities to give our customers a lower-cost alternative with fast lead times. Avalon Precision Metalsmiths also offers value-added services such as the design and build for all internal tooling, vacuum assist technology, in-house heat treat, machining, assembly & NDT, as well as supply chain management.
